

License Expiration

Does your state frown on agents practicing with an expired license? Mine does!

Broker Office Solutions makes it so easy for you to ensure not one of your agents forget to renew his or her license. As you add an agent record you will have the opportunity to enter a license expiration date. As that date draws near your system will remind you that the agent needs to renew, and you will be able to remind the agent with a couple of clicks of the mouse. It has never been easier to stay out of trouble with the state.
