

Auto Calculate Commissions

Did I mention that Broker Office Solutions calculates commissions for you? Throw that calculator away!

Broker Office Solutions can calculate all of your commissions for you...automatically...easily.

Can it calculate different commissions for different agents? You bet it can!

What if every agent has a unique commission structure? No problem.

What about tiered commission structure? It can do it.

Flat fees and splits, or combinations of both? Yes sir.

When you hire a new agent the form will ask you about a commission structure. Simply enter the necessary information and when that agent closes a transaction the commission will be calculated for you. What's more it will generate a "check stub"/Receipt for the transaction that you can give to payroll or include with the agents check.
